STOP

Invasive Aquatic Mussels

Quagga Mussel

Zebra Mussel

Unwanted plants and animals can ruin
our favorite fishing and boating waters.

After boating, remove all visible signs of plants, mud, or animals.
Drain water from your boat, bait buckets and live wells before leaving the area.
Clean and dry everything that came in contact with the water
(including boat trailer, rear end of vehicle, and fishing equipment).
Never release anything into a body of water unless it came out of that body of water.

Do not boat in known infested waters to avoid being banned or quarantined.

UPDATE: (January 2008): Harmful zebra mussels were found in San Justo Reservoir in San Benito County.
